

**COCKERMOUTH
URBAN DISTRICT COUNCIL**

Annual Report

of the

MEDICAL OFFICER OF HEALTH

ANTONY HARGREAVES, M.B., Ch.B., D.P.H.

FOR THE YEAR 1966

Together with the Summary of Work
of the Public Health Inspector

Urban District Council of
Cockermouth

ANNUAL REPORTS

Medical Officer of Health

and the

Public Health Inspector

for the year

1 9 6 6

TO THE CHAIRMAN AND MEMBERS OF THE
COCKERMOUTH URBAN DISTRICT COUNCIL

Mr. Chairman and Gentlemen,

I have the honour to present my first annual report as Medical Officer of Health to Cockermouth Urban District.

My appointment is held jointly with Cockermouth Rural District, Keswick Urban District and Cumberland County Councils.

The report is along the lines followed by my predecessors and there are no outstanding variations in the statistics from previous years. The vital statistics are on the whole very satisfactory, although it must be borne in mind that the population of the area is small and therefore too much significance should not be attached to some of the figures quoted.

The incidence of communicable diseases during the year would appear to have been low certainly so far as notifications are concerned, measles was the only notifiable disease numbered in any quantity. One suspects that where notifiable diseases of mild impact are concerned with respect to the figures quoted appearances are deceptive. There was one new case of pulmonary tuberculosis notified during the year.

The severe flooding that occurred this year was the worst for many years and caused considerable destruction, loss of property and general hardship. There was no loss of life, and no outbreak of enteric or other communicable disease.

The second part of this report has been prepared by Mr. Simpson who took up his duties as Public Health Inspector to this Council in November, 1966. I would record my appreciation of the co-operation and help which I receive from him at all times.

I would like to express my thanks for the invaluable assistance given to myself by Mrs. K. Nairn of the Health Department, and for the help given me by the Clerk and his staff, and for the kindness and helpfulness shown to me by the members of the Council.

I am,

Mr. Chairman and Gentlemen,

Your Obedient Servant,

ANTONY HARGREAVES,
Medical Officer of Health.

STAFF OF THE HEALTH DEPARTMENT

Medical Officer of Health :

A. HARGREAVES, M.B., Ch.B., D.P.H.

W. R. SIMPSON, M.A.P.H.I., M.R.S.H., A.M.I.P.H.E.

Public Health Inspector and Surveyor :

COCKERMOUTH URBAN DISTRICT COUNCIL

GENERAL STATISTICS

Area : Acres	2,040
Registrar General's estimate of resident population (mid 1966) ...	6,140
Number of inhabited houses (end 1966) according to Rate Books	2,250
Rateable Value at 31st December, 1966	192,121
Sum represented by Penny Rate (1-4-66—31-3-67)	£752 1 11

POPULATION

The population figure of 6,140 is given for the year 1966 by the Registrar General and called by him the "Home Population". On this figure the birth and death rates and the incidence of notifiable diseases are based.

The population figure for 1965 was 6,080.

CHIEF OCCUPATIONS OF THE INHABITANTS

Cockermouth is an old market town (its Royal Charter having been granted in the year 1221). For many years Saw-Mills, Building Contractors, a Brewery and the Railway (now closed) have employed a considerable number of persons (mainly male) and since 1939 five new works of employment were commenced; one of these, a Blood Manure factory, has ceased; the other four are made up of a Shoe and Slipper factory, a Clothing factory, a light engineering works and a Precast Concrete works, employing altogether 1,100 persons including a large number of female labour, particularly at the two first-named which also have workers from outside the Urban area. There are as well, of course, those individuals absorbed by the usual businesses and trades of a small country town. A few find employment about the large cattle Mart, whilst a few are engaged in agriculture, and in coal mines, quarries and steelworks outside the district.

STATISTICAL SUMMARY

The Tables of vital statistics are set out in the following pages.

The crude birth and death rates are corrected by means of an Area Comparability Factor supplied each year by the Registrar General. They allow for varying age and sex distribution of the population in different areas and enable comparisons to be made with figures for other areas.

This year the factor for births is 1.0 and for deaths 1.08.

The total live births was 106. This gives a birth rate of 17.3 per thousand of the population (17.3 corrected), compared with 98—16.0 per thousand of the population (16.0 corrected)—in 1965. Illegitimate live births in 1966 numbered 3 (2.8% of all live births).

There were 3 still births during the year ; and 3 deaths among infants under one year of age (including 2 amongst infants under four weeks of age), all as a result of Congenital Malformation. This caused an infant mortality rate of 28.3 per thousand live births, and an neo-natal mortality rate of 18.8 per thousand live births. The early neo-natal mortality rate was 0. per thousand live births. The perinatal mortality rate was 27.5 per thousand live and still births.

The number of deaths at all ages was 85, giving a death rate of 13.8 (14.9 corrected) per thousand of population, compared with 14.8 (15.0 corrected) for 1965.

There were no maternal deaths during the year, nor any deaths from tuberculosis.

Cancer deaths during 1966 were 16. The cancer death rate per thousand of population was 2.6 (1965—2.6). Approximately 1 death in 5 was due to cancer.

Senile deaths (deaths occurring over age 65) were 59—69% of all deaths. (71% in 1965).

There were 4 deaths from violence in 1966 (3 in 1965)—1 due to motor vehicle accident, 2 to other accidents, and 1 due to suicide.

VITAL STATISTICS

Population of the Urban District is 6,140.

LIVE BIRTHS :—

		Males	Females	Total	Grand Total	Rate per 1000 pop. Uncor.	Rate per 1000 pop. Cor.

GENERAL PROVISION OF HEALTH SERVICES

(a) STAFF

The appointment of Dr. A. Hargreaves as Medical Officer of Health for the area commenced on the 1st September, 1966.

(b) LABORATORY SERVICES

All microbiological work is carried out in the Carlisle Laboratory of the Public Health Laboratory Service. I am most grateful to Dr. D. G. Davies, the Director of the Laboratory, for his help during the year.

(c) LOCAL HEALTH AUTHORITY SERVICES

Medical services provided under Part III of the National Health Service Act, and Welfare Services provided under the National Assistance Act are the responsibility of the Cumberland County Council. Information about these services, including the provision of Home Nursing and Maternity Services, Home Helps, Immunisation Services, Accommodation for the Physically Handicapped, assistance for the Unmarried Mother, assistance and advice in connection with Family Planning, Accommodation for the Aged, may be obtained from the Area Health Office, Stoneleigh, Park End Road, Workington.

The local clinic is at Harford House, Cockermouth. The times, places and services are as follows :—

Cockermouth	Child Welfare—Mondays 2 p.m.
	School Clinic—By appointment.
	Dental Clinic—By appointment.
	Speech Therapy—By appointment.

The services include specialist advice on the assessment and correction of vision and hearing defects.

A scheme for the screening of women for the prevention of cancer of the neck of the womb is in operation — one session each week at Cockermouth on Tuesdays at 2 p.m. by appointment.

Immunisation procedures are carried out at the Child Welfare Clinics and at schools by arrangement, including B.C.G. vaccination.

(d) NATIONAL ASSISTANCE ACTS

No enforcement action was taken during the year to secure proper care and attention for the elderly and chronic sick.

INFECTIOUS DISEASE

The total number of cases of Infectious Disease notified in 1966 was 16, 7 of which were measles.

There were no deaths from Tuberculosis, but one new Pulmonary case was notified.

Two cases of Puerperal pyrexia were notified.

IMMUNISATION

SMALLPOX.

Age when vaccinated or re-vaccinated	Number Vaccinated	Number Re-vaccinated
Under 1 year	—	—
1 yr.—23 months	26	—
2—4 years	13	—
5—14 years	1	3
15 or over	—	—
	<hr/> 40 <hr/>	<hr/> 3 <hr/>

Statistics relating to smallpox vaccination complications have shown that the safest age at which to perform this process is around two years.

DIPHTHERIA/TETANUS/WHOOPING COUGH.

The figures in the table show the number of triple antigen immunisations performed during the year, both primary courses and booster doses.

In all, 90 children completed a primary course and 84 had booster doses.

Children over five do not have the whooping cough component.

POLIOMYELITIS.

181 people received a primary course of oral vaccine in 1966, of which 103 were children under the age of five.

B.C.G. TUBERCULOSIS

Mantoux Testing and B.C.G. vaccination was continued in 1966, the age groups concerned being those born in 1953 plus a few older ones not previously tested.

Of 165 children attending schools in Cockermouth who were tested 29 proved to be positive reactors, who had not previously been vaccinated.

ANNUAL REPORT
OF THE PUBLIC HEALTH INSPECTOR AND SURVEYOR
W. R. SIMPSON, M.A.P.H.I., M.R.S.H., A.M.I.P.H.E.
For the Year 1966

Mr. Chairman and Gentlemen,

I have pleasure in presenting my first annual report to the Council for the year 1966.

As I did not commence work with the Council until November, 1966, the majority of information provided in this report is the work of my predecessor Mr. J. J. Pattison.

As a result of sick periods and the period of time between the resignation of my predecessor and my commencing work, the number of visits made during the year is less than previous years.

Much important work has been carried out during the year especially with regard to housing, street lighting and general public health work, but due to the wide variety of duties to be carried out by one person some important work has been neglected. 100% meat inspection was achieved and inspections under the provisions of the Offices, Shops and Railway Premises Act, 1963, were carried out by Mr. S. C. Holmes who was transferred to the office for this work from the outside staff.

The most outstanding memory of the year appears to be the severe flooding which occurred during the summer months. At this time severe rains caused flooding of the Bitter Beck to such an extent that many houses were flooded, some families displaced and household possessions damaged. It is encouraging to note that the Council have considered the appointment of Consulting Engineers to advise on remedial work.

In conclusion I wish to express my appreciation of the help and co-operation given to me by Dr. A. Hargreaves, the Clerk, his staff, my clerical assistant Mrs. K. Nairn, and my foreman Mr. C. Wilson.

I am,

Your Obedient Servant,

W. R. SIMPSON,

Public Health Inspector and Surveyor.

WATER SUPPLY

The following information has been kindly supplied by Mr. J. P. Williamson, B.Sc., A.M.I.C.E., A.M.I.W.E., Water Engineer to the West Cumberland Water Board, who are responsible for water supplies to the area. I am indebted to Mr. Williamson for his assistance in compiling this part of the Report.

The water which is supplied to the area of the Cockermouth Urban District Council comes from Crummock Water and is conveyed by gravity to the Moor Reservoir in Cockermouth by means of a 15 inch diameter cast iron main.

At present the water is treated at Lorton where lime is added to reduce the acidity of the water and the water is chlorinated to kill any bacteria which may be present. A new Treatment Works is at present under construction near Cornhow Farm, which is about one mile north of Crummock Water, it is anticipated that these works will be in operation in the autumn of 1968.

There are two pressure zones in the distribution system within the area of the Urban District itself, the first being supplied by gravity from the Moor Reservoir; the other zone is supplied by means of a pump situated at the Moor Reservoir which delivers water to Sunscals Reservoir and by this means supplies the higher parts of the town.

During 1966 the average consumption of water in the town was 358,000 gallons per day, of which 207,000 gallons per day were supplied by gravity from the Moor Reservoir and 151,000 gallons per day were supplied from the Sunscals area. This represents a consumption of 57.7 gallons per head per day.

Regular bacteriological analyses of the water were carried out, the great majority of which gave "excellent" results. When the sample was not up to this standard remedial action was taken and a further check taken.

DRAINAGE AND SEWERAGE

The sewage disposal works continued to operate satisfactorily but on occasions the flooding in the River Derwent caused the outlet level in the sewage disposal works to rise above the humus tanks and up into the filter beds — On these occasions, the final effluent was far from satisfactory.

With the exception of 44 houses and a caravan site, which have private sewage disposal facilities, all properties in the district are connected to public sewers.

REFUSE REMOVAL AND DISPOSAL

There is a weekly collection of both domestic and trade refuse to all parts of the town. The refuse is collected by a kerbside bin collection. This collection method, whilst being adequate at present is not to be recommended for the long term future.

Refuse is disposed of by controlled tipping at the Lorton Road tip and was carried out satisfactorily.

FACTORIES ACT, 1937 TO 1961

There are 54 factories in the area as follows :

Business	Powered	Non-Powered
Engineering	1	
Shoe Manufacturing	2	
Clothing Manufacturing	1	
Baking	4	3
Joinery	5	
Joinery and Sawmilling	4	
Concrete Products	1	
Printing	2	
Gas Storage	1	
Brewing	1	
Motor Vehicle Repairs	11	1
Agricultural Machinery Repairs	3	
Panel Beating	1	
Slaughterhouses	1	1
Building Sites	4	
Water Filtration	1	
Monumental Masons	1	
Knackers Yard		1
Dressmaking	1	
Grist Crushing	1	
Egg Grading	1	
Fruit Machine Repairs	1	

The following table shows the position under the Factories Acts, 1937 to 1961, in this district at the end of 1966 :—

Premises (1)	Number on Register (2)	Inspections (3)	Number of Written notices (4)	Occupiers prosecuted (5)
(i) Factories in which Sections 1, 2, 3, 4 and 6 are to be enforced by Local Authorities	6	4	0	—
(ii) Factories not included in (i) in which Section 7 is enforced by the Local Authority	44	1	0	—
(iii) Other Premises in which Section 7 is enforced by the Local Authority (excluding out-workers' premises)	4	9	0	—
Total	54	14	0	—

Number of cases in which defects were found

Particulars (1)	Found (2)	Remedied (3)	Referred		Number of cases in which prosecutions were instituted (6)
			To H.M. Inspector (4)	By H.M. Inspector (5)

(c) Not separate for sexes	—	—	—	—	—
Other offences against the Act (not including off- ences relating to Outwork)	—	—	—	—	—
Total	—	—	—	—	—

(NOTE—Section 1 refers to cleanliness ; 2 to overcrowding ; 3 to temper-
ature ; 4 to ventilation ; 6 to drainage of floors ; 7 to sanitary conveniences)

OFFENSIVE TRADES

The firm of fellmongers which previously operated in the town has now ceased business during the year and no offensive trades are at present in operation.

PREVENTION OF DAMAGES BY PESTS ACT, 1949.

218 visits were made and 38 premises were treated for rats and mice infestations. 2 of the properties being business premises. The techniques of the Ministry of Agriculture, Fisheries and Food were adopted and the poisons employed were zinc phosphide and Warfarin.

FOOD

Apart from Slaughterhouses 86 visits were made to various food premises.

Inspection of foodstuffs resulted in the following foods being condemned as unfit for human consumption :—

5 lb. 6 oz.	canned	Apricots
1 lb.	„	Apricot Jam
1 lb. 15½ oz.	„	Beans (Baked)
2 lb. 14 oz.	„	Beans (Broad)
22 lb.		Bacon
1 lb. 3 oz.	„	Baby Food
2 lb.	pkt.	Pearl Barley
4 oz.	canned	Bournvita
2 lb. 11 oz.	„	Carrots
8 oz.	„	Chicken
21 lb. 7 oz.	„	Corned Beef
1 lb.	pkt.	Cornflour
8 oz.	„	Cooking Chocolate
	„	Chocolate Cake Mix
2 oz.	„	Cream
	„	Cornflakes

2 lb. 10 oz.	canned	Evaporated Milk
5 lb. 12½ oz.	„	Fruit Salad
1 lb.	„	Fruit Cocktail
14 lb. 12½ oz.	„	Grapefruit
83 lb.	„	Ham
1 lb. 3 oz.	„	Chopped Ham with Pork

12 bottles Soda Water	1 lb. Beans

SLAUGHTERHOUSES

There is one private licensed slaughterhouse in the area and one public abattoir operated by Mitchell's Auction Co. Ltd. Both slaughterhouses continued to operate satisfactorily. The private slaughterhouse has not been used to a great extent during the year, the owners relying upon the public abattoir in Lorton Street.

The accommodation at the public abattoir in Lorton Street comprises two large off loading bays for the delivery of animals, Lairage, Slaughterhall, Cooling and Hanging Hall, Suspect Holding Bay, Hide and Skin Room, Gut Room, Mess Room, Wash Room with W.C., shower and changing facilities, Office and two separate out loading bays, one for fresh meat and one for hides, skins and waste products.

Although provision has been made for the future installation of a pig dehairing machine and a refrigerated Cold Room, this work has not yet been carried out.

423 Visits were made to the Slaughterhouses for meat inspection purposes.

SUMMARY OF SLAUGHTERING, 1966
